The compensation effect you need is highly depending on your boat and mooring lines. With the Smart Snubber you can easily adjust the compensation effect by adding some more Snubbers on the same line. The material used in the Snubber is a special polyurethane with outstanding durability that will do the job in all weather conditions and still keep its shape and tension after many years of wearing and tearing.</p> <p>Smart Snubbers with its handy and small size and attractive navy blue colour makes an interesting choice for boat owners when it comes to mooring compensators.</p>
