

# The Rope-Clip™

Page 19

A NEW patented  
product from  
Teknikutveckling  
Enek Hb  
SWEDEN

The Rope- Clip is a remarkably simple product for making quick mechanical splices without any previous experience. These results can be altered quickly to suit requirement. It works with braided or standard ropes. A simple eye splice or one using a thimble are now immediately possible, also long splices are now easily variable.

## How to Installation The Rope-Clip™ for 12- 14 mm rope **OBS! ONLY EXPORT!**

**1.**  
Thread the  
rope into  
the clip  
shown by  
arrows  
leaving  
22cm free.

Carefully  
check the  
tension  
around the  
thimble.

**3**  
Thread the  
rope end  
back into the  
clip. Insert  
the thimble  
as shown  
and draw  
tightly.

Check  
with a light  
pressure to  
ensure  
securely  
locked.
